

We are looking for an **NLP Engineer (m/f/d)**

About IntraFind

We are an established software manufacturer and specialist in enterprise search and AI-based document intelligence headquartered in Munich, Germany with offices in Bonn (Germany) and New York City.

Your Tasks

- ▶ Develop natural language processing (NLP) components for our products and projects
- ▶ Work on topics such as information extraction, query intent recognition, ranking, text classification and intelligent document conversion
- ▶ Apply a wide range of tools - whether it's heuristics, rule-based methods or machine learning, you're not afraid of the tried-and-true methods or the latest deep transfer learning
- ▶ Evaluate ideas, be creative and implement solutions to product maturity
- ▶ Use own developments, open source tools and frameworks according to need, technical and economic sense; JVM-based languages, Python or web technology
- ▶ Take responsibility for your work and that of your team: from conception and implementation to development and maintenance of the CI pipeline to delivering your contribution to the product

Why IntraFind?

- ▶ State-of-the-art technologies for high-scaling search and NLP
- ▶ Established company with well-known customers
- ▶ Listed in the Gartner Magic Quadrant for Insight Engines
- ▶ An agile and growing team with over 65 motivated colleagues
- ▶ We are owner-managed and self-financed and live a very familiar but professional team spirit
